Desktop Application for Vet Clinic
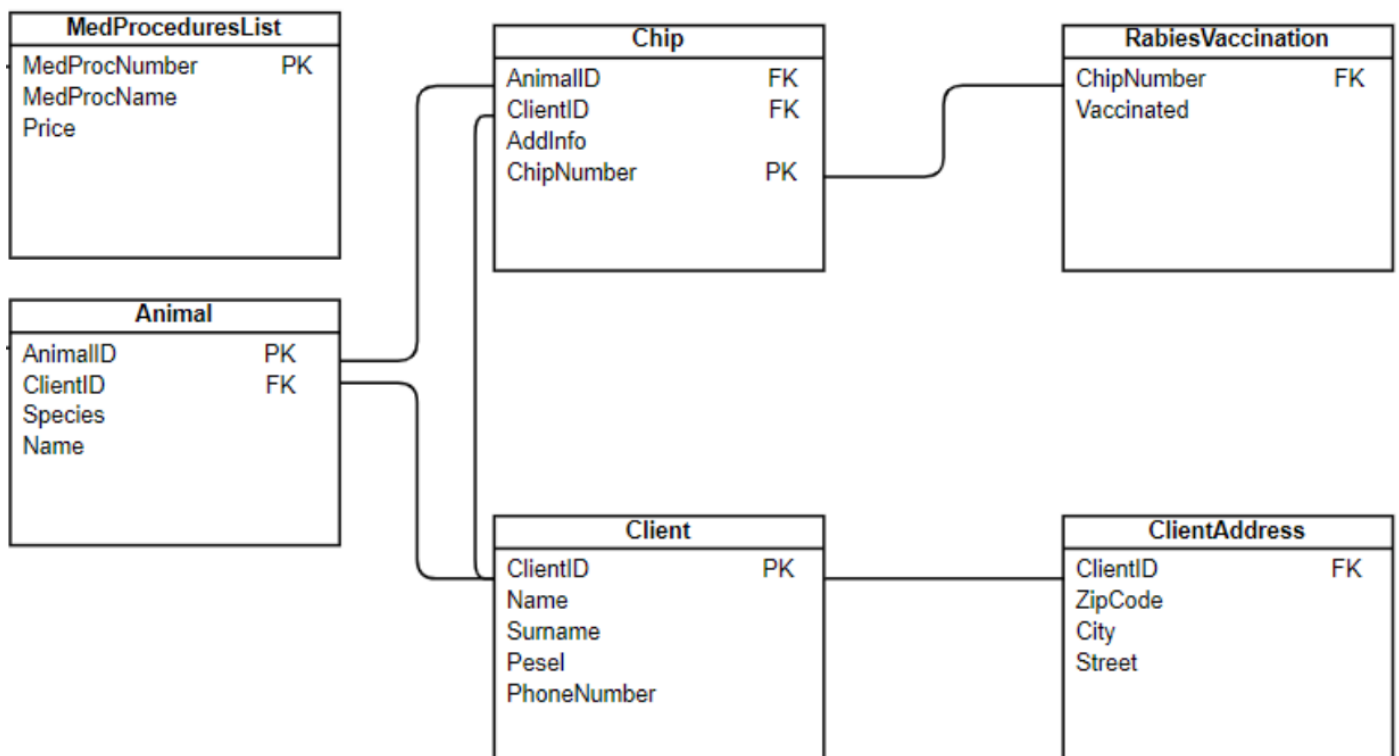

1. UI Design:

   - STARTING WINDOW: first window we can see after run an application is simple window with button that allows us to open the application main window (on the main page),

   - APPLICATION MAIN WINDOW: we can see there a menu with RadioButtons and VET logo on the left side of the window, a PNG picture of cat in the center, and exit plus minimalize buttons at the top of the right side

   - MENU: there are 5 buttons letting us to see 5 differet views, four for different table of SQL Database. Each of them contains DataGrid showing records of tables, and in most of views we can also add our own records to database tables. Last one view is main, aesthetic page of the application window.

2. SQL Database structure:

There are six tables in sql database created for this application project – relations between them are showed above.
